

Workplace Collaboration/Lotus

IBM Workplace is a family of products that consists of Lotus Notes and Domino, IBM Workplace Collaboration Services, IBM Workplace Services Express, and IBM WebSphere Portal, and IBM WebSphere Everyplace. These offerings help to consolidate and present whatever resources users need, including business processes, collaboration capabilities, information, documents and productivity tools.

Sessions in this COS provide insight into the use and implementation of the IBM Workplace family of products. Whether you're a newcomer or a seasoned veteran, you will be provided the tools to make your organization more productive, improve communications, and make it easier for people to work together. Together, Workplace and iSeries can provide an effective architecture for collaboration and communication environments.

Why IBM Workplace F06 Miami Sessions: Thursday, 9/21/2006

21MQ: Mon 8 - 9:15, B216, Miami Conv Ctr

ID:510141

Level:
All

Course:
Workplace
Collaboration/
Lotus

Speaker:
John M.
Taylor
COMMON UK

How do you collaborate and integrate with your business applications? Are email and MS Office enough? If not, take a look at IBM Workplace. Your users can work smarter in a portal. Your applications can give managers control of their processes. You can save money on desktop software and management - including a Linux client option. Learn about the future of Notes & Domino and find out why System i is the only server platform that makes sense.

IBM Lotus Sametime 7.5

23MQ: Mon 11 - 12:15, B216, Miami Conv Ctr

ID:510201

Level:
All

Course:
Workplace
Collaboration/
Lotus

Speaker:
Tim Kounadis
IBM Corporation

Join Tim Kounadis, Director, Worldwide Channels and Product Marketing, IBM Lotus Software to hear the latest buzz on Lotus' hottest product available on iSeries. With more than 150 new and enhanced features, IBM Lotus Sametime 7.5 software offers powerful real-time collaboration capabilities, including a new instant messaging (IM) client, a completely enhanced Web conferencing user experience, federation with public IM networks, integration with leading telephony and desktop video providers and integrated Voice over IP. With its open and fully extensible design, Lotus Sametime software transforms a real-time collaboration program to a real-time collaboration platform, enabling IBM Business Partners and developers to easily deliver customized real-time business solutions. It also serves as a foundation for advanced organizational collaboration and social networking tools, allowing companies to improve business practices with fast response times and increased productivity.

Ensuring a Smooth Workplace Services Express Deployment on i5/OS

25MO: Mon 2 - 3:15, B214, Miami Conv Ctr

ID:510038

Level:
Advanced

Course:
Workplace
Collaboration/
Lotus

Speaker:
Kim Greene
Kim Greene
Consulting, Inc.

This session will show you how to smoothly deploy a Workplace Services Express (WSE) environment. There are a number of components that must come in to play for a successful deployment of WSE: LDAP, DB2 UDB, HTTP, WAS, Portal. This can be daunting if you're just getting started with WSE. Fear not, this session will guide you through the ins and outs of ensuring success. One of these success factors is deployment on a server that is able to provide all of the supporting services of WSE in one integrated package. The i5 platform provides all of this and more.

Domino 7 Upgrade Considerations

25MQ: Mon 2 - 3:15, B216, Miami Conv Ctr

ID:510134

Level:
All

Course:
Workplace
Collaboration/
Lotus

Speaker:
Trevor
Tallackson
IBM Corporation

Domino 7 continue to help customers protect and enhance existing messaging and collaboration investments. The newest version offers capabilities to improve user productivity, reduce TCO, extend applications and simplify administration. This presentation will cover System i5 upgrade considerations to help you in planning and upgrading your Domino environment to the latest release.

F06 Miami Sessions: Thursday, 9/21/2006

IBM Workplace Strategy for i5/OS

26MQ: Mon 3:30 - 4:45, B216, Miami Conv Ctr

ID:460060

Level:
Advanced

Course:
Workplace
Collaboration/
Lotus

Speaker:
Mardi
Donahoe
IBM Corporation

The IBM Workplace Portfolio provides new options for collaboration, including lightweight messaging for current underserved messaging users, distance learning, and sophisticated organized user interfaces. And, choices such as LINUX desktops are now an option! Companies large and small are investigating and implementing Workplace solutions to provide better teaming tools along with the current messaging structure, whether it is Domino messaging or Exchange messaging. Invest an hour to come learn how the Workplace Portfolio of products could enhance your environment.

Introduction to Integrating Domino and DB2

32MK: Tue 9:30 - 10:45, B210, Miami Conv Ctr

ID:409222

Level:
All

Course:
Workplace
Collaboration/
Lotus

Speaker:
Kim Greene
Kim Greene
Consulting, Inc.

One of the major strengths of the iSeries is its ability to easily run and integrate many applications on a single system. Domino is no exception to that. Come learn how to integrate Domino applications with your existing iSeries data. Topics discussed include Domino Enterprise Connection Services (DECS), Lotus Enterprise Integrator (LEI), LotusScript, Java, as well as other connectors and techniques.

By the end of this session, attendees will be able to:

1. Describe the tools available to integrate Domino with DB2.
2. Choose the correct integration option for the job.
3. Explain the benefits and trade-offs of the various tools and programming options.

Backup and Recovery of Lotus Notes Data on i5/OS

32MQ: Tue 9:30 - 10:45, B216, Miami Conv Ctr

ID:440006

Level:
All

Course:
Workplace
Collaboration/
Lotus

Speaker:
Trevor
Tallackson
IBM Corporation

This session will go over all options customers have to backup Lotus Notes Data on iSeries systems! Will compare and contrast all options (including TSM - Tivoli Storage Manager) and go in details to set up, and execute instructions for save and restore of Lotus Notes data via Online Domino Backup Feature of BRMS/400! This presentation will explore full saves / incremental saves and which one to implement depending upon customer environment! Come to this session everything you need to know about Lotus Notes Backup/Restore on iSeries!

By the end of this session, attendees will be able to:

1. Understand Lotus Notes Backup/Restore strategies on iSeries.
2. Select their own Lotus Notes backup Strategy.
3. Set up Online Domino Backups.

Taking Advantage of Domino Domain Monitoring in Domino 7

33MQ: Tue 11 - 12:15, B216, Miami Conv Ctr

Kim Greene
Consulting, Inc.

Domino Domain Monitoring (DDM) is a new function added to the Lotus Domino 7 product. This new feature is every Domino administrator's dream come true. It automates problem determination and significantly reduces the amount of time required to discover and analyze server problems. DDM also offers a central place to find server errors and receive recommendations on how to resolve problems. Come to this session to learn how you can take advantage of this new functionality in Domino 7.

F06 Miami Sessions: Thursday, 9/21/2006

Domino Problem Determination

35MQ: Tue 2 - 4:45, B216, Miami Conv Ctr

ID:407202

Level:

All

Domino administrators need to learn all the techniques that are available to solve problems.

Course:

Workplace
Collaboration/
Lotus

In this session, learn:

1. How to diagnose and resolve Domino server problems.
2. Techniques and commands to help administer the Domino for iSeries server.
3. Troubleshooting Tips for Domino server crashes, including steps to take, information to collect, prevention procedures.

IBM Corporation

Integrated Seminars provide in-depth education on a specific subject, are part of the general conference and include lecture and lab components. Signing up for an Integrated Seminar is a commitment for a full day of the conference; be sure to stay for the entire seminar so you won't miss critical education! There is no additional fee and seats are limited. Registration is required via the lab registration system.

Domino Administration Seminar:
Come learn how to manage and be proactive with Lotus Domino administration. This hands-on workshop will help you gain the skills necessary to manage a Domino iSeries environment. This workshop will help you solve common Domino administration mistakes and cover the following topic areas: policy implementation, administration process, out of office agent, maintenance, performance tuning, and Domino 7 enhancements. By the end of this workshop you will have a clear understanding of you to successfully manage a Domino for iSeries environment.

In this this seminar, attendees will:

1. Learn about the out of office functionality, administration process, Domino 7 Domino Domain Monitoring (DDM) and policies.
2. Learn how to secure your Domino server as well as manage spam.
3. Learn Domino Tuning Tips including how to better manage your operating system with proper memory pool allocation, disk balancing, transaction logging, IFS settings, run-time prioritization, and TCP/ IP and network configurations.
4. Learn mail file management tips including how to reduce mail file sizes with built-in archiving support.
5. Perform labs that will give you a hands on look at Domino CL commands, policies, the administration process, nsds, DDM, BRMS and a chance to debug a server that will not start.

As a bonus, Domino development labs will be available. You may choose to optionally perform the development labs or take them home with you. These labs will show you the basics for writing a LotusScript application including how to find a bug using the LotusScript debugger.
